### ***Juror's Statement***

Becoming an artist is a great undertaking. Commitment to one's craft, developing a vision for a given subject, and executing the final work is developed over many years of effort. A certain amount of pain and suffering for the artistic process is required. As an artist matures, their "voice" evolves and finds its place in the world. Creating art is a beautiful and worthy endeavor when it is approached with determination, thoughtfulness, and honesty. True greatness is rare, but it is this hope of surpassing our goals that drives us forward. Be vigilant, search endlessly for inspiration, and the joy of sharing your gift will enrich the world around you.

***Jason Down***
